Stat Enclosure Infection Prevention Barrier For Use in Emergency Rooms, Operating Rooms, ICU, EMS & Fire, Mass Causality/Pandemic Events and Garrison Military Facilities and Downrange Mobile Military Commands

Protects caregivers during high-risk procedures

Easy: Disposable that folds to less than one inch thick and weighs only 10 ounces

Stability: Clips allow for securement to bed or stretcher mattress

Fast Set up: Wire frame opens (22"x22"x22.5) in seconds for rapid placement

Access: Easy access from all sides to aid in multiple procedures and intubation assistance.

Multi-Purpose: After intubation STAT can be left on the patient during mechanical ventilation or as an aid in the brief isolation of a COVID-19 patient in a high-risk area.

This product complies with FDA Emergency Use Authorization for protective barrier enclosures during the COVID-19 Pandemic, issued May 1, 2020.
