

Non-Powered Stand Assist Options

Ideal fall prevention and non-powered lift assist device for patients with limited weight bearing and mobility concerns

- Allows the patient to pull them themselves up from a sitting position but provides a safe and comfortable seated position during the transfer to another seated position
- No plugs, no power, no cord, and no sling needed
- Available in either a 400# or 450# weight capacity
- Legs are easily spread on the 450# model to capture wider chair or wheelchair openings
- Ideal for toileting transfers with no slings getting in the way
- Rugged and durable for outside car transfers upon arrival or discharge
- Ideal fall prevention and non-powered lift assist device for patients with limited weight bearing and mobility concerns
