

ALTERNATING PRESSURE SEATING SYSTEM

APPROPRIATE FOR AT-RISK VETERANS WHO SPEND SIGNIFICANT AMOUNTS OF TIME SEATED IN CHAIRS.

TECHNOLOGY THAT MOVES YOU

THE EASE CUSHION SYSTEM creates movement under the user to promote blood flow and oxygenation to tissues, as well as localized pressure relief, for the treatment and prevention of decubitus pressure ulcers.

THE CUSHION features a contoured foam base with two independently controlled air bladder arrays which create motion under the user. All of this is protected by a breathable and fluid-resistant cover.

THE SIZES 9 standard sizes are available, consisting of any combination of 16, 18, and 20-inches of width and depth. Custom sizes that fall outside or in-between this range may be requested, and are subject to upcharge.

ASSEMBLED IN THE U.S.A.
