Escort by Amigo Mobility is a motorized patient transport chair that helps reduce injuries related to patient transport compared to manual options.

## Benefits

- Accommodates all patients up to 750 lbs
- Heavy duty drive
- Automatic braking system with parking brake pedal
- Zero turn radius
- Swivel seat for easy on / off
- Built in IV Pole and O2 Tank holder

## Why go motorized?

- 🛡️ **Safety** | Motorized chair is safer for patients and employees
- 📈 **Efficiency** | Motorized chair is more maneuverable
- ⚙️ **Ergonomics** | Motorized chair is less strain on employees compared to wheelchairs

**Escort by Amigo Mobility**  
Bariatric motorized transport chair

## What Registered Nurses have to say about Escort by Amigo Mobility

I really like the Amigo Escort and it seems to be appropriate for our bariatric patients. It's ability to "take the load off" of my shoulders and back when getting the patient from one place to the other is great. I love the ability to turn the chair 90 degrees for transferring patients when they are ambulatory. Our other bariatric mover requires us to connect it to the wheelchair, so I love that we don't need to do that with the Escort system!

– RN, Utah

The Escort is user friendly, the patients feel comfortable and safe in this chair. This chair has been a missing link to what we have needed when transporting patients.
