

H-250

Convertible chair for moving, repositioning and transferring patients

- Provides safe transfer to and from bed
- Limitless number of positions
- Ideal for home use

The H-250 Convertible Chair is a unique device that easily converts from a stretcher to an upright mobile chair in seconds. Its Tilt-in-Space capability allows for increased blood circulation helping to prevent skin breakdown and other complications of immobility.

With its 113 kg/250 lbs capacity, the H-250 provides a no-lift solution for moving, repositioning and transferring patients in the safest manner possible.

The H-250 chair together with a Patient Transfer System (PTS) offers the ability to move between a bed and a chair with ease and enables a single caregiver to easily transfer a patient. Read more about our PTS on page 10.
