Hand & Hand Medical

INTRODUCES **BulbPendant**
U.S. PATENT AWARD 2015

New protocol for Bulb Drain Management... BulbPendant is the first system for managing drains that can easily be administered in the PACU/PAR. Safe, hygienic, and easy to use. Patients now have greater ambulation throughout every stage of the healing process. Available directly to hospitals and clinics producing the best possible patient outcomes.

www.handandhandmed.com

BulbPendant IS THE ONLY COMPREHENSIVE DRAIN SYSTEM THAT:

- Can be worn consistently without being removed for the duration of drain use.
- Can be used with multiple drains.
- Can be worn bathing.
- Can be easily viewed to monitor for drain emptying.
- Can be emptied without removing the drain from the device.
- Can be used with Female, Male, and Child patients of all sizes.
- Can be worn to the side without affecting performance (Sash).
- Can be used with multiple surgery recoveries (Breast, Cardiac, Thoracic, Abdominal, Plastic/Reconstructive).
- Can be used with Medical Devices (Outboard Pacemaker, Colostomy, Pain Pump, etc).
- Can be easily concealed while worn underneath patient clothing.
- Can be positioned away from Flap, Graft & Surgery sites without affecting performance or comfort.

What professionals and patients are saying about BulbPendant:

"The hospitals have been supplying BulbPendant for our patients for over a year, the results have been great! I highly recommend it."

–Dr. James Hoyt MD, Surgeon

"Hand & Hand was so helpful in my recovery after my surgery, it was easy to use and I would definitely recommend this product."

–L. Baker, North Carolina

"It has been a great experience working with Hand & Hand Medical, these products have proven to be a wonderful improvement in the recovery process of our members of the breast cancer survivor community."

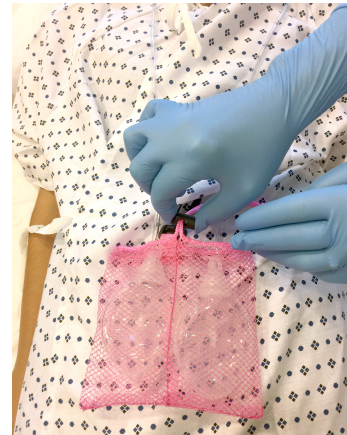

–Rose Barlow, Zero Breast Cancer Foundation

"The products you invented were so helpful after my mastectomy, I will continue to spread the word."

–K. Bangs, Florida

"...this drain holder is a lifesaver! Thank you so much!"

–Christi, California

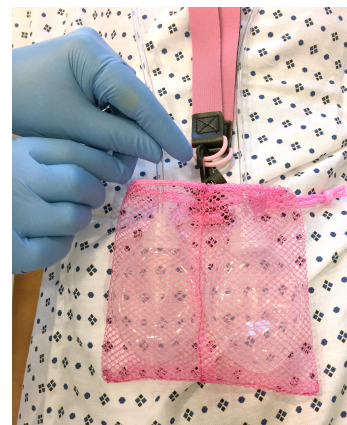

PACU/PAR BulbPendant Use

Patients rest comfortably while BulbPendant is administered as it does not interfere with existing Monitors and/or IV's:

Installing BulbPendant in recovery is an easy process, drains are simply inserted into the waterproof pouch often while patients sleep

Strap is easily slid around the back of the neck

Strap is simply clipped in place completing the installation and drains are safely stowed. Hospital staff and patient are now ready for effective monitoring and management of drains before the patient's feet "hit the floor."
